42 firearm-related incidents took place in the region last week

The Armed Violence Monitoring Platform (AVMP) recorded 42 firearm-related incidents that took place in the region from 7 to 13 October 2019.

These are some of the incidents captured on our platform:

About the AVMP

The AVMP monitors firearms-related incidents happening in South East Europe. Established in 2014, the AVMP collects detailed data from the media reports and reports of public institutions where available, covering Albania, Bosnia and Herzegovina, Kosovo*, Republic of Moldova, Montenegro, Serbia and North Macedonia.

The collected data range from the type of incident, firearms used, age and gender of the victim and the perpetrator, outcome of the incident. etc. Basic data analysis is also provided for various data sets aiming to discover trends related to the incidents.

The purpose of the AVMP is to make essential data available to all interested parties working on small arms and light weapons control. The AVMP can serve as an informative tool for interventions with the overarching goal of a more effective arms control framework and the reduction of their negative impact on civilians.

Cookies on our web page

What is Cookie?

A cookie is a small piece of data sent from a website and stored in a user's web browse while a user is browsing a website. When the user browses the same website in the future, the data stored in the cookie can be retrieved by the website to notify the website of the user's previous activity

How do we use cookies?

A visit to a this page could generate the following types of cookie.

Strictly necessary cookies

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies services you have asked for, like shopping baskets or e-billing, cannot be provided.

2. Performance cookies

These cookies collect information about how visitors use a website, for instance which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

3. Functionality cookies

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located. These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customise. They may also be used to provide services you have asked for such as watching a video or commenting on a blog. The information these cookies collect may be anonymised and they cannot track your browsing activity on other websites.

4. Targeting and advertising cookies

These cookies are used to deliver adverts more relevant to you and your interests They are also used to limit the number of times you see an advertisement as well as help measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organisation.

Cookie management

Cookies can be managed via the web browser settings. Please, see you browser help how to manage cookies.

On this site you can always turn cookies on/off on menu item "Cookie Management".
