Practitioners from the Albanian State Police enhanced their knowledge on the physical security and stockpile management of small arms and light weapons and their ammunition

On 18 October 2019, twenty experts from the Albanian State Police (ASP) completed a week-long targeted National Course on Physical Security and Stockpile Management (PSSM) of Small Arms and Light Weapons (SALW) and their Ammunition. The course was funded by the United States government and organized by UNDP SEESAC. The main objective of the course was to enhance the capacities of the personnel tasked with planning, managing, and safeguarding stockpiles of SALW and their ammunition.

This national course on PSSM of SALW and their ammunition is part of the activities under the UNDP SEESAC Project for the enhancement of SALW control security measures in Albania funded by the United States. The recently completed upgrades of the ASP Main Supply Centre "Mullet" - SALW and ammunition storage location, as well as the upcoming upgrade of the two locations of the Ministry of Defence (MoD): SALW and ammunition storage location "Mirake" and "Zall - Herr" Garrison Land Force Command, will serve to enhance the security of the SALW stored by the competent authorities, leading to more efficient management of stockpiles and contributing to a holistic approach to SALW control.

Cookies on our web page

What is Cookie?

A cookie is a small piece of data sent from a website and stored in a user's web browser while a user is browsing a website. When the user browses the same website in the future, the data stored in the cookie can be retrieved by the website to notify the website of the user's previous activity.

How do we use cookies?

A visit to this page could generate the following types of cookie.

Strictly necessary cookies

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies services you have asked for, like shopping baskets or e-billing, cannot be provided.

2. Performance cookies

These cookies collect information about how visitors use a website, for instance which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

3. Functionality cookies

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located. These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customise. They may also be used to provide services you have asked for such as watching a video or commenting on a blog. The information these cookies collect may be anonymised and they cannot track your browsing activity on other websites.

4. Targeting and advertising cookies

These cookies are used to deliver adverts more relevant to you and your interests. They are also used to limit the number of times you see an advertisement as well as help measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organisation.

Cookie management

Cookies can be managed via the web browser settings. Please, see your browser help how to manage cookies.

On this site you can always turn cookies on/off on menu item "Cookie Management".
