Helping Keep Citizens Safe - SEESAC and UNDP Providing a Regional Training Course on Stockpile Management

The recent explosion at the ammunitions storage site in Cyprus that killed 13 and injured 60 people is a sobering reminder of how important it is that weapons and ammunition be kept in appropriate facilities and that they are handled by well trained professionals. This is precisely why the South Eastern and Eastern Europe Clearinghouse for the Control of Small Arms and Light Weapons (SEESAC), with the support of UNDP Bosnia and Herzegovina, has organized a **regional training course on stockpile management** for members of the ministries of defence and interior from the Western Balkans region.

From **September 12th-16th, in Sarajevo**, 19 operational level officials from the ministries of defence and interior of Bosnia and Herzegovina, Croatia, Montenegro, Serbia and the former Yugoslav Republic of Macedonia underwent a training on **Planning and Managing of Stockpile Locations**. This was the first module of the three-module course.

All the modules are taking place at the Faculty of Mechanical Engineering of the University of Sarajevo, and are conducted by a team of prominent experts from the Western Balkans and Germany. The course curriculum is in line with international standards and best practices in stockpile management with special emphasis on safety and security of stockpiles and quality of stockpile procedures. Because of its regional character, the participants also benefit from the exchange of experiences and best practices identified by their colleagues from the region who are facing similar challenges.

The training is made possible by the European Union (EU), which is providing the funds under the EU COUNCIL DECISION 2010/179/CFSP of 11 March 2010 to support SEESAC arms control activities in the Western Balkans in the framework of the EU Strategy to combat the illicit accumulation and trafficking of SALW and their ammunition.

The first training is the first part of a three-part training course on Stockpile Management organized by SEESAC. The course is designed to help countries in the region increase their capacities in the area of stockpile management procedures and thereby increase the physical control over the existing storages in the region. The next two trainings, which will be held in October and November respectively, will focus on **Inventory Management and Accounting Control Procedures** as well as **Stockpile Facilities and Transportation of SALW and Associated Ammunition**.

Cookies on our web page

What is Cookie?

A cookie is a small piece of data sent from a website and stored in a user's web browser while a user is browsing a website. When the user browses the same website in the future, the data stored in the cookie can be retrieved by the website to notify the website of the user's previous activity

How do we use cookies?

A visit to a this page could generate the following types of cookie.

Strictly necessary cookies

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies services you have asked for, like shopping baskets or e-billing, cannot be provided.

2. Performance cookies

These cookies collect information about how visitors use a website, for instance which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

3. Functionality cookies

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located. These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customise. They may also be used to provide services you have asked for such as watching a video or commenting on a blog. The information these cookies collect may be anonymised and they cannot track your browsing activity on other websites.

4. Targeting and advertising cookies

These cookies are used to deliver adverts more relevant to you and your interests They are also used to limit the number of times you see an advertisement as well as help measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organisation.

Cookie management

Cookies can be managed via the web browser settings. Please, see your browser help how to manage cookies.

On this site you can always turn cookies on/off on menu item "Cookie Management".
