

SEESAC Announces a New Project and Continues its Decades-long Work

SEESAC is proud to announce its new project *Support for Enhancing the Fight Against the Illegal Possession, Misuse and Trafficking of Small Arms and Light Weapons (SALW) in the Western Balkans*.

Funded by the European Union, represented by the European Commission, Directorate-General for Neighborhood and Enlargement Negotiations, through the Instrument for Pre-accession Assistance (IPA II), this €5 million project aims to strengthen strategic and operational capacities of the Western Balkans authorities to conduct firearms investigations, as well as to share information within the region and with the EU on illegal possession, misuse, and trafficking of SALW and their ammunition. In addition, it will support the authorities of the region to better understand and increase the response to the factors fueling demand and misuse of firearms in the Western Balkans, as well to better integrate gender into SALW control processes.

This 3 year-long project directly complements the current and builds on the work previously done by SEESAC, with the support of the EU through the EU Council Decisions 2016/2356, 2018/1788 and 2019/2111.

Activities envisioned by the project contribute to the implementation of selected aspects of the Western Balkans SALW Control Roadmap. They do so by tackling four specific goals.

- 1. Establishing a network of functioning Firearms Focal Points (FFPs) in the Western Balkans.** While the operationalization of FFPs in the region has been previously initiated and supported through the EUCDs 2016/2356 and 2018/1788, this project will sustain and build on that effort. A network of FFPs will be supported through comprehensive technical assistance to increase the analytical capacities of these units, as well as through provision of specific tools, and organization of workshops and meetings in order to share best practices. The action will retain a degree of flexibility to respond to the needs identified by the network and to facilitate information sharing and promote regional cooperation including with the EU Member States. The FFPs main aim and role is the improve the intelligence picture of firearms trafficking.
- 2. Strengthening capacities of authorities in the Western Balkans to conduct crime scene investigations in accordance with relevant EU good practices and guidelines.** The primary beneficiary of these activities will be crime scene investigation units that will be provided with a number of tools including: Train the Trainers activities focusing on crime scene investigation and photography, as well as the establishment of a custody chain; Support in aligning existing SOPs with that of the European Network of Forensic Science Institutes; Support in preparation for the ISO 1702 accreditation; Provision of basic and advanced CSI equipment/kits; and Guidance on electronic evidence.
- 3. Increasing response to factors fueling demand and misuse of firearms in the Western Balkans.** This goal will be tackled on two fronts. First, the project will enhance knowledge of factors fueling demand and misuse of firearms in the WB through much needed in-depth research of both perpetrators and victims of firearms incidents, as well as through an examination of firearms in popular culture. Secondly, the project will help raise awareness and operational capacity among key beneficiaries by: Establishing a regional task force to contribute to standardization of design, management, monitoring and evaluation of awareness campaigns as well as sharing of best practices; Organizing bi-annual thematic meetings where proposals and best practices addressing most relevant and current problems will be discussed; Developing guidelines for policymakers on awareness raising dealing with various phases of campaigns and aspects of awareness raising; Providing technical advisory support to jurisdictions in designing, monitoring and implementing awareness campaigns as well as financial support for the implementation of these campaigns.
- 4. Strengthened capacities for mainstreaming gender into SALW control by institutions in Western Balkans.** The project will narrow in on the remaining challenges with regards to the institutional response to the use of firearms in domestic violence, insufficient capacities of relevant institutions to mainstream gender in their work, addressing gender factors fueling demand for firearms, participation of women in arms control, and gender sensitive data collection. Building on the work done through the implementation of the EU Council Decisions 2016/2356, 2018/1788 and 2019/2111, the project will address the above issues through capacity development, risk assessment methodologies, gender sensitive licensing tools, as well as inter-institutional cooperation.

What is Cookie?

A cookie is a small piece of data sent from a website and stored in a user's web browser while a user is browsing a website. When the user browses the same website in the future, the data stored in the cookie can be retrieved by the website to notify the website of the user's previous activity

How do we use cookies?

A visit to a this page could generate the following types of cookie.

Strictly necessary cookies

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies services you have asked for, like shopping baskets or e-billing, cannot be provided.

2. Performance cookies

These cookies collect information about how visitors use a website, for instance which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

3. Functionality cookies

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located. These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customise. They may also be used to provide services you have asked for such as watching a video or commenting on a blog. The information these cookies collect may be anonymised and they cannot track your browsing activity on other websites.

4. Targeting and advertising cookies

These cookies are used to deliver adverts more relevant to you and your interests They are also used to limit the number of times you see an advertisement as well as help measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organisation.

Cookie management

Cookies can be managed via the web browser settings. Please, see you browser help how to manage cookies.

On this site you can always turn cookies on/off on menu item "Cookie Management".
