Activities and National Projects

- Upgrade of the existing software for evidence of weapons license
- Developing of the component “B” of this software
- Electronically connectivity of the trade company with the Ministry of interior. In this way MOI can be able to check “on line” all weapons, their parts and ammunition which are stored in their magazines and storages.
- Besides this, the legal entities, or the trade companies would put an obligation for keeping a registry for monitoring of production (manufacture), repair and the transport of the weapons. The registry contains inscriptions of all the abovementioned data.

Activities and National Projects

- Improvement of the physical security at warehouse “Orman”;
- Building a fence around the warehouse;
- Putting security video-supervision around the warehouse;
- Setting of illumination in the whole warehouse.
